IN THE CLAIMS:

Please cancel claims 23-54 without prejudice.

Please add the following new claims:

- 55. (new) A pharmaceutical composition for the treatment of a vascular disease or condition selected from the group consisting of atherosclerosis, hyperlipidemia, and hypoalphalipoproteinemia in a human, comprising a pharmaceutically acceptable and a therapeutically effective amount of unilamellar phospholipid liposomes free of drug wherein at least 68% of the liposomes have a mean diameter of about 125 ± 30 nm, which liposomes mobilize more cholesterol than an equal amount of unilamellar phospholipid liposomes having a mean diameter of 30 ± 7 nm as measured in mice.
- 56. (new) The pharmaceutical composition of claim 55 wherein 68% of the liposomes have a mean diameter between about 100-150 nm.
- 57. (new) The pharmaceutical composition of claim 55 in which the therapeutically effective amount is about 0.1-1.5 gm/kg.
- 58. (new) The pharmaceutical composition of claim 55 in which the therapeutically effective amount is about 0.28-0.42 gm/kg.
- 59. (new) The pharmaceutical composition of claim 55 in which the therapeutically effective amount is about 300 mg per kg body weight.
- 60. (new) The pharmaceutical composition of claim 55 comprising a pharmaceutically acceptable carrier selected from the group consisting of sterilized water, sterilized buffered water, sterilized saline solution, and a sterilized aqueous solution.
- 61. (new) The pharmaceutical composition of claim 60 wherein the pharmaceutically acceptable carrier contains a compound selected from the group consisting of glycine, a glycoprotein, albumin, a lipoprotein, a globulin, a pH adjusting agent, a buffering agent, a tonicity adjusting agent, sodium acetate, sodium lactate, sodium phosphate, potassium chloride, calcium chloride, sodium chloride, and mixtures thereof.
- 62. (new) The pharmaceutical composition of claim 60 wherein the concentration of liposomes in the carrier is in the range of about 20-200 mg/ml.

- 63. (new) The pharmaceutical composition of claim 60 wherein the concentration of liposomes in the carrier is about 200 mg/ml.
- 64. (new) The pharmaceutical composition of claim 60 wherein the concentration of liposomes in the carrier is in the range of about 50-150 mg/ml.
- 65. (new) The pharmaceutical composition of claim 60 wherein the concentration of liposomes in the carrier is about 100 mg/ml.
- 66. (new) The pharmaceutical composition of claim 55 wherein the composition is lyophilized.
- 67. (new) The pharmaceutical composition of claim 55, wherein the phospholipid is selected from the group consisting of egg phosphatidylcholine, egg phosphatidylglycerol, distearoylphosphatidylcholine, distearoylphosphatidylglycerol, phosphatidylcholine, phosphatidylglycerol, lecithin, β , γ -dipalmitoyl- α -lecithin, sphingomyelin, phosphatidylserine, phosphatidic acid, phosphatidylethanolamine, lysolecithin, lysophosphatidylethanolamine, phosphatidylinositol, cephalin, cardiolipin, oleoyl-palmitoyl-phosphatidylcholine, dipalmitoylphosphatidylcholine, dipalmitoylphosphatidylcholine, dipalmitoylphosphatidylglycerol, dioleoylphosphatidylglycerol, palmitoyl-oleoyl-phosphatidylcholine, di-stearoyl-phosphatidylcholine, di-stearoyl-phosphatidylcholine, di-stearoyl-phosphatidylethanolamine, di-stearoyl-phosphatidylethanolamine, di-myrstoyl-phosphatidylserine, and mixtures thereof.
- 68. (new) The pharmaceutical composition of claim 55, wherein the phospholipid is selected from the group consisting of phosphatidylcholine, phosphatidylglycerol, and mixtures thereof.
- 69. (new) The pharmaceutical composition of claim 55, wherein the phospholipids are in a liquid crystalline phase at about 37°C.
- 70. (new) A pharmaceutical composition for the treatment of a vascular disease or condition selected from the group consisting of atherosclerosis, hyperlipidemia, and hypoalphalipoproteinemia in a human, comprising a pharmaceutically acceptable and a therapeutically effective amount of unilamellar phospholipid liposomes free of drug which liposomes are effective in promoting cholesterol efflux without causing a substantial increase in LDL or esterified cholesterol levels.
- 71. (new) The pharmaceutical composition of claim 70 wherein the liposomes have a mean diameter between about 100-150 nm.
- 72. (new) The pharmaceutical composition of claim 70 in which the therapeutically effective amount is about 0.1-1.5 gm/kg.

Bis

- 73. (new) The pharmaceutical composition of claim 70 in which the therapeutically effective amount is about 0.28-0.42 gm/kg.
- 74. (new) The pharmaceutical composition of claim 70 in which the therapeutically effective amount is about 300 mg per kg body weight.
- 75. (new) The pharmaceutical composition of claim 70 comprising a pharmaceutically acceptable carrier selected from the group consisting of sterilized water, sterilized buffered water, sterilized saline solution, and a sterilized aqueous solution.
- 76. (new) The pharmaceutical composition of claim 75 wherein the pharmaceutically acceptable carrier contains a compound selected from the group consisting of glycine, a glycoprotein, albumin, a lipoprotein, a globulin, a pH adjusting agent, a buffering agent, a tonicity adjusting agent, sodium acetate, sodium lactate, sodium phosphate, potassium chloride, calcium chloride, sodium chloride, and mixtures thereof.
- 77. (new) The pharmaceutical composition of claim 75 wherein the concentration of liposomes in the carrier is in the range of about 20-200 mg/ml.
- 78. (new) The pharmaceutical composition of claim 75 wherein the concentration of liposomes in the carrier is about 200 mg/ml.
- 79. (new) The pharmaceutical composition of claim 75 wherein the concentration of liposomes in the carrier is in the range of about 50-150 mg/ml.
- 80. (new) The pharmaceutical composition of claim 75 wherein the concentration of liposomes in the carrier is about 100 mg/ml.
- 81. (new) The pharmaceutical composition of claim 70 wherein the composition is lyophilized.
- 82. (new) The pharmaceutical composition of claim 70, wherein the phospholipid is selected from the group consisting of egg phosphatidylcholine, egg phosphatidylglycerol, distearoylphosphatidylcholine, distearoylphosphatidylglycerol, phosphatidylcholine, phosphatidylglycerol, lecithin, β , γ -dipalmitoyl- α -lecithin, sphingomyelin, phosphatidylserine, phosphatidic acid, phosphatidylethanolamine, lysolecithin, lysophosphatidylethanolamine, phosphatidylinositol, cephalin, cardiolipin, oleoyl-palmitoyl-phosphatidylcholine, dipalmitoylphosphatidylglycerol, dioleoylphosphatidylcholine, dipalmitoyl-phosphatidylcholine, di-stearoyl-phosphatidylcholine, stearoyl-palmitoyl-phosphatidylcholine, di-palmitoyl-phosphatidylethanolamine, di-stearoyl-phosphatidylethanolamine, di-myrstoyl-phosphatidylserine, and mixtures thereof.
